

Welcome to our Creative World of GelGems!

GelGems are a stunningly simple way of turning your Windows, Patio Doors, Mirrors, Tiles or any non-porous surface into stunning works of art!!

Kids love GelGems as they are bright, colourful and can be easily moved about allowing endless creativity!!

Grown-ups love GelGems for the same reasons but also as Glass Door and Window markers for birds and, of course, humans!

Schools, Surgeries, Shops, Offices all use GelGems to brighten up views and put a smile on people's faces!

GelGems are easy to apply as no surface preparation is needed just stick them on! Oh and to remove them? Why that's easy too, just peel them off!!

GelGems can be washed, re-used and, in fact, repackaged so that they can be used time after time which is great for our Halloween and Xmas Ranges!

GelGems are the brand leader and the only ones made of food oils and thus totally safe. We just don't recommend GelGems for under 3's due to choking. Fully tested for e-coli and other germs GelGems are edible but honestly we don't recommend them as they simply don't taste as nice as they look!

GelGems will survive in high temperatures but can soften and even melt if placed in excessively hot and sunny places such as sealed Summer Houses. Bright and continuous sunlight will ultimately cause fading depending on colour.

Remember do not stick GelGems to porous surfaces such as paint, wood or enamel surfaces. If in doubt test a small out of site area first. If staining does occur we recommend gentle application of nail varnish remover but again to try a small area first to make sure it works!!
